

Sco internship day 28

1. Detection Ratio

61 engines detected it. 65 engines scanned it.

2. File Hashes

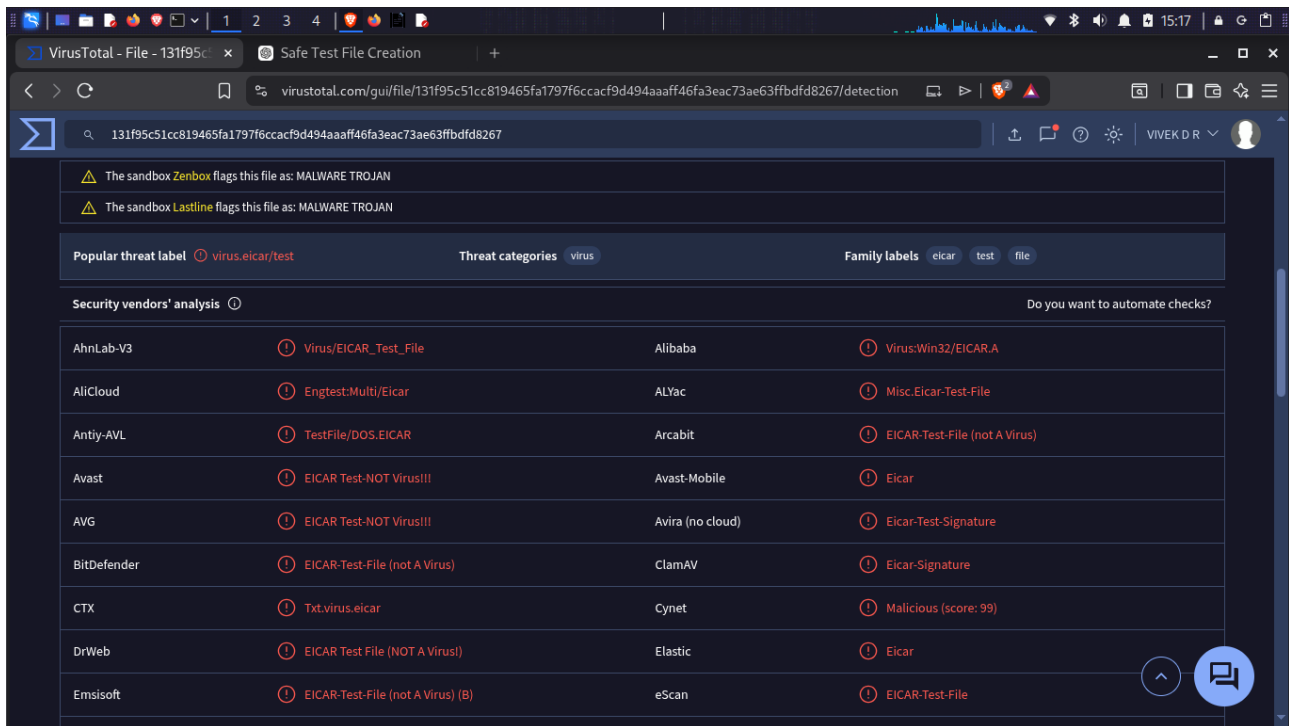

Hash Type	Purpose
MD5	Legacy file identifier
SHA1	Older forensic identifier
SHA256	Most commonly used IoC

MD5 69630e4574ec6798239b091cda43dca0

SHA-1 cf8bd9dfddff007f75adf4c2be48005cea317c62

SHA-256 131f95c51cc819465fa1797f6ccacf9d494aaaff46fa3eac73ae63ffbfd8267

3. Scan Engine Results

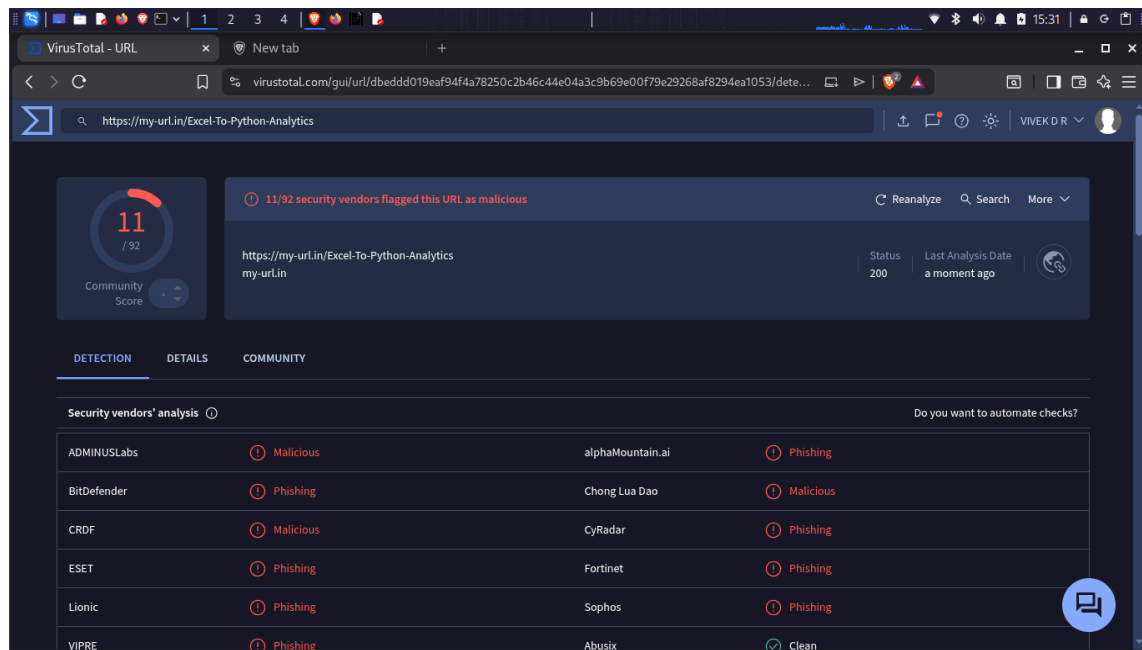

The screenshot shows the VirusTotal web interface for a file scan. The URL in the address bar is `virustotal.com/gui/file/131f95c51cc819465fa1797f6ccacf9d494aaaff46fa3eac73ae63ffbfd8267/detection`. The file hash is `131f95c51cc819465fa1797f6ccacf9d494aaaff46fa3eac73ae63ffbfd8267`. The interface shows that the file is flagged as "MALWARE TROJAN" by sandboxes Zenbox and Lastline. The "Popular threat label" is `virus.eicar/test`. The "Threat categories" are `virus`. The "Family labels" are `ecar`, `test`, and `file`. The "Security vendors' analysis" section shows a table of results from various vendors.

Vendor	Detection	Vendor	Detection
AhnLab-V3	Virus/EICAR_Test_File	Alibaba	Virus:Win32/EICAR.A
AliCloud	EngTest:Multi/Eicar	ALYac	Misc.Eicar-Test-File
Antiy-AVL	TestFile/DOS.EICAR	Arcabit	EICAR-Test-File (not A Virus)
Avast	EICAR Test-NOT Virus!!!	Avast-Mobile	Eicar
AVG	EICAR Test-NOT Virus!!!	Avira (no cloud)	Eicar-Test-Signature
BitDefender	EICAR-Test-File (not A Virus)	ClamAV	Eicar-Signature
CTX	Txt.virus.eicar	Cynet	Malicious (score: 99)
DrWeb	EICAR Test File (NOT A Virus!)	Elastic	Eicar
Emsisoft	EICAR-Test-File (not A Virus) (B)	eScan	EICAR-Test-File

The EICAR test file is a harmless standard file used to verify antivirus detection systems. When uploaded to VirusTotal, it typically shows a very high detection ratio because most antivirus engines are designed to recognize it as a test signature. The file hash (especially SHA256) uniquely identifies the sample for tracking and comparison in security tools. Different engines may label it with names like “EICAR-Test-File” or similar variants. Some security products may not flag it, depending on configuration or signature updates. Although it appears as a detection alert, it is not real malware but a controlled test signature. In a production environment, this alert would usually not be escalated as a threat, but it confirms that detection and monitoring systems are working correctly.

Url dectection

Detection Ratio

11 engines detected it. 92engines scanned it.

Observation

The URL `https://my-url.in/Excel-To-Python-Analytics` was analyzed on VirusTotal.

- 11 out of 92 security vendors flagged the URL as malicious/phishing.
- Multiple reputable security engines, including BitDefender, ESET, Fortinet, Sophos, CyRadar, and alphaMountain.ai, identified the URL as either Phishing or Malicious.
- VirusTotal categorized the URL under phishing-related classifications such as "phishing and fraud" and "webmail/phishing".
- The URL returned an HTTP 200 OK status, indicating that the webpage is currently accessible.
- The analysis was performed recently, suggesting the detection results are current.

Short Summary

The VirusTotal scan indicates that the URL `my-url.in/Excel-To-Python-Analytics` presents a potential security risk, with 11 security vendors detecting it as malicious or phishing-related. Although not all vendors flagged the site, the presence of multiple phishing detections suggests that users should avoid accessing the URL and refrain from entering credentials or sensitive information until its legitimacy can be independently verified.
